Residential² & Lodging³ Uses			
>Notes: ¹ Mixed-Use includes: (1) vertically mixed buildings with retail uses on the 1st floor and office and/or residential uses on floors above the 1st floor; (2) approved development plans that have conditions requiring a mixture of retail, office, and residential uses and that requires Form Based Code Design; (3) compact developments of ¼-mile or less in radius measured from the center of the development that feature a mixture of retail, office, and residential uses, a gridded street network with speed limits of 25 MPH or less, sidewalks along both sides of streets, and no roads functionally classified as an arterial or major collector internal to the development; or (4) Mixed-Use or Multimodal Oriented Developments (MMODs) that meet criteria established by the Village of Indiantown. ² Residential square feet is the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls or walls adjoining public spaces such as multifamily or dormitory hallways, or the centerline of common walls shared with other dwelling units. Square feet include all livable, habitable, and temperature controlled enclosed spaces (enclosed by doors, windows, or walls). This square footage does not include unconditioned garages or unenclosed areas under roof. For multifamily and dormitory uses, common hallways, lobbies, leasing offices, and residential amenities not accessible to the public are not included in the square feet calculation, unless that space is leased to a third-party use and provides drinks, food, goods, or services to the public or paid memberships available to individuals that do not reside in a dwelling unit. The mobility fee ordinance will address additions and redevelopment that result in an increase in person travel above and beyond the existing use of land. ³ Any space that is leased to a third-party use or provides drinks, food, goods, or services to the public shall be required to pay the applicable mobility fee per the individual uses identified in the mobility fee schedule. ⁴ Acreage does not include circulation, buffers, stormwater facilities or open areas not used for storage.

Residential² & Lodging³ Uses			
⁵ Free-standing Retail means a single building where any single use under a common lease or ownership exceeds 75% of the total square footage of the building. ⁶ Free-Standing Bank Drive-Thru Lanes or ATMs are physically separated from a bank building and are oriented towards convenient access by motor vehicle. Drive-thru lanes and ATM's physically attached to a financial institution or a building, such as a grocery store, are not assessed a mobility fee. Free Standing ATMs may be accessed either by motor vehicle, by foot, or by wheel for mobility impaired persons and people on bikes. ⁷ Motor Vehicle or Boat cleaning shall mean any car wash, wax, or detail where a third party or automatic system performs the cleaning service. Mobility Fee are assessed per lane, stall, or cleaning and detailing station. ⁸ Rates per vehicle charging or fueling position apply to a convenience store, gas station, general store, grocery store, supermarket, superstore, variety store, wholesale club or service stations with fuel pumps. In addition, there shall be a separate mobility fee for the square footage of any retail building per the applicable mobility fee rate. The number of charging or fueling positions is based on the maximum number of vehicles that could be charged or fueled at one time. Non-commercial vehicle charging stations associated with residential or non-residential uses shall not be assessed a mobility fee, unless there is commercial enterprise requiring payment to charge an electric vehicle. ⁹ For fast food or quick service restaurants with one or more drive-thru lanes that are 1,000 sq. ft. or less, or provide ten or less indoor seats for patrons, mobility fees shall be assessed per drive-thru lane. For fast food or quick service restaurants that are greater than 1,000 sq. ft. or provide more than ten seats indoors for patrons to sit, a mobility fee shall not be assessed for the first drive-thru lane. And addition drive-thru lanes will be assessed a mobility fee per drive-thru lane plus the mobility fee for the building. The number of drive-thru lanes will be based on the number of lanes present when an individual places an order or picks up an order, whichever is greater. Fast food or quick service restaurants maybe free-standing,
