## APPENDIX P: TOWN OF LAKE PARK MOBILITY FEE

<sup>1</sup> The Town of Lake Park may elect to establish a program that establishes criteria to qualify as affordable, attainable or workforce housing. Until the County or City establishes a program, and an applicant receives formal approval, the affordable, attainable or workforce housing mobility fee rate would not be applicable.

<sup>2</sup> Residential square feet is the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls or walls adjoining public spaces such as multifamily or dormitory hallways, or the centerline of common walls shared with other dwelling units. Square feet include all livable, habitable, and temperature controlled enclosed spaces (enclosed by doors, windows, or walls). This square footage does not include unconditioned garages or unenclosed areas under roof. For multifamily and dormitory uses, common hallways, lobbies, leasing offices, and residential amenities not accessible to the public are not included in the square feet calculation, unless that space is leased to a third-party use and provides drinks, food, goods, or services to the public or paid memberships available to individuals that do not reside in a dwelling unit.

<sup>3</sup> Any space that is leased to a third-party use or provides drinks, food, goods, or services to the public shall be required to pay the applicable mobility fee per the individual uses identified in the mobility fee schedule.

<sup>4</sup> Acreage for any unenclosed material and vehicle storage, including but not limited to boats, commercial vehicles, recreational vehicles (RV), and trailers, sales and display shall be converted to square footage.

<sup>5</sup> The Town of Lake Park may elect to establish a program that establishes criteria to qualify as a small retail business. Until the County or City establishes a program and an applicant receives formal approval, the small retail business mobility fee rate would not be applicable.

<sup>6</sup> Retail includes all uses that do not fall under Drinking Establishment & Restaurant or Convenience Retail.

<sup>7</sup> Drinking Establishment & Restaurant includes chain and national high turn-over and sit down restaurants (non fast food), bars, nightclubs, lounges. test ITE Generation Manual. These uses generate less than 150 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual.

<sup>8</sup> Convenience Retail includes convenience stores, gas stations, service stations, coffee, donut, sandwich, food and beverage that would be considered fast food or quick service restaurants. These uses generate more than 150 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual.

<sup>9</sup> Additive multimodal transportation impact fees are assessed in addition to the multimodal transportation impact fees assessed with the square footage of the building.

<sup>10</sup> Bank shall pay the retail rate for the square footage of the building under the retail use category. Drive-thru lanes, Free Standing ATM's and Drive-thru lanes with ATM's are assessed a separate fee per lane or per ATM and are added to any mobility fee associated with a bank building. The free-standing ATM is for an ATM only and not an ATM within or part of another non-financial building, such as an ATM within a grocery store.

<sup>11</sup> Motor Vehicle or Boat cleaning shall mean any car wash, wax, or detail where a third party or automatic system performs the cleaning service. Mobility Fee are assessed per lane, stall, or cleaning and wash station, plus a retail rate associated with any additional building square footage under retail uses.

<sup>12</sup> Rates per vehicle charging or fueling position apply to a convenience store, gas station, general store, grocery store, supermarket, superstore, variety store, wholesale club or service stations with fuel pumps. In addition, there shall be a separate mobility fee for the square footage of any retail building per the applicable mobility fee rate under commercial and retail uses. The number of charging or fueling positions is based on the maximum number of vehicles that could be charged or fueled at one time. Non-commercial vehicle charging stations associated with residential or non-residential uses shall not be assessed a mobility fee, unless there is cost or payment required to charge an electric vehicle.

<sup>13</sup> Any drive-thru associated with a pharmacy will be an additive fee in addition to the applicable retail mobility fee per square foot of the building under retail uses. The number of drive-thru lanes will be based on the number of lanes present when an individual places or pick-up a prescription or item. This includes any pharmacies located within a dispensary, grocery store, super market, variety store, or wholesale club.

<sup>14</sup> Any drive-thru associated with a quick service restaurant (aka fast food) will be an additive fee in addition to the applicable retail mobility fee per square foot of the building. The number of drive-thru lanes will be based on the number of lanes present when an individual places an order or picks up an order, whichever is greater. Quick service restaurants include those in convenience stores or multi-tenant buildings.
